

Discover Your Life Purpose

BONUS – Titles & Industries

To Do List

- 1. When identifying your title or industry remember you won't 'just be a' it's what YOU bring to the role and what and how you do it that is most important to fulfilling your life purpose. Identifying your title or industry simply gives you the medium to best fulfil your purpose in life.**
- 2. Before deciding upon your title or industry first list out your ideal job in terms of how you will feel, aspects you know you already like such as where you may work (office, outdoors, from home etc), what type of people you would like to work with, the hours you would like to work, level of responsibility, challenges, variety in the role, your strengths and current skills etc.**

P.S: Once you have identified your ideal industry and/or role then don't delay in taking action to either move to it or best prepare yourself so you can.
